

Leading Innovation Since 1962.

As the originators of vertical stacked fan coil units and heat pumps, The Whalen Company is one of America's most innovative leaders in the commercial heating and air conditioning industry. Today, more than a half century after our founding, we continue to provide solutions for new and replacement air conditioning applications. We have participated in thousands of applications worldwide and continue to introduce new innovations.

The number of industry "firsts" from Whalen is impressive. A few of our firsts include: the industry's first vertical stack valveless fan coils, the first vertical stack heat pump offering, the first slide-out chassis ducted vertical heat pumps, and the first AHRI-listed water-cooled air conditioning units with hydronic heat.

Our flexibility and expertise allow us to meet the needs of our customers by providing a design that fits seamlessly into the building. [To learn more, visit whalencompany.com/innovation.](http://whalencompany.com/innovation)
