3. Check P-Trap Connection

6. Insert chassis into the return opening
7. Note: Depending on the gap between the return panel and the unit, it may require a sheet metal bridge to slide the chassis into the unit.

4. Bring chassis to the return opening
5. Center chassis in the return opening

8. Carefully lower or lift the chassis onto the rails in the unit.
9. Note: Depending on the gap between the return panel and the unit, it may require a sheet metal bridge to slide the chassis into the unit.

- 10. Before sliding the chassis completely into the unit, connect the water hoses.
- 11. Finish sliding the chassis into the unit.

- 13. The chassis is installed and the water and electrical connections are made.
- 14. Install the Inner Panel.
- 15. Option - reinstall the lower sight panel if needed.

- 12. Connect the chassis wiring to the bottom of the electrical panel.

- 16. Panel is closed and the chassis installation is complete.

Behind every unit that carries the Whalen name is a singularity of purpose: the engineering and manufacturing of products that improve the quality of life for our customers.

Our long-term commitment to this endeavor assures you of systems that are distinctive in **concept**, **performance**, **reliability** and **value**.

The number of industry “firsts” from Whalen is impressive. They include:

- The industry’s first vertical stack valveless fan coils
- The first vertical stack heat pump offering
- The first removable chassis closet-type heat pumps
- The first AHRI-listed water-cooled air conditioning units with hydronic heat

Let us put Whalen innovation to work for you, too. Find out how our approach to your project will deliver a “perfect fit” solution – and make your life easier.
